

May 6, 2009 – Year 6 – MS4 Annual Report to the Town of Lloyd Town Board

My name is Shari Riley. I am a Code Enforcement Officer for the Town of Lloyd. I have also been designated as the Stormwater Management Program Coordinator and as of August 1, 2008 am a Certified Professional in Erosion and Sediment Control – IT.

NYS DEC issued a new SPDES General Permit for Stormwater Discharges from Municipal Separate Storm Sewer Systems (MS4s) (GP-0-08-002) that went into effect May 1, 2008. This is a two year permit. By law, we are required to present this annual report to the Town Board in a public meeting setting to help keep the Town Board, other Town representatives and the public aware of the Town of Lloyd's efforts to comply with the mandated state and federal regulations pertaining to Stormwater Discharges from Municipal Stormwater Systems (better known as MS4s). The annual report must be recorded as part of the minutes as well as the number of people attending and questions and answers presented in the meeting.

The handout you have before you is the Annual Report for year 6 (March 10, 2008 to March 9, 2009). This report is to be filed with the NYSDEC before June 1, 2009. Bill Rohde and I prepared the report and because of a prior commitment he cannot be here to present with me.

A copy of this report is to be maintained on file at the Office of the Town Clerk and available on the Town of Lloyd website for public access. After this meeting I ask that you please take some time to read this report and let me know if there are any issues that need clarification.

The Town of Lloyd is one of 13 regulated municipalities in Ulster County that is required to establish an effective ***Stormwater Management Plan (SWMP)*** for MS4 Compliance.

The term MS4 includes both municipal and non-municipal systems of underground pipes, and also systems of streets and roads with drainage, catch basins, curbs, gutters, ditches, man-made channels and storm drains, whether or not the system is owned by a municipality.

Federal and State laws required that an SWMP had to be fully developed and implemented in the Town of Lloyd by January 8, 2008. This effort started in

2003 when the Town filed a Notice of Intent with the NYSDEC to establish such a plan. On April 12, 2007, the Town Board adopted its Town Stormwater Management Plan. A copy of the SWMP must be maintained at Town Hall for inspection by USEPA and NYSDEC and the Public. What this has done is create a partnership between all Town Departments to help implement the MS4 obligations of the Town. There is a strong foundation in place to have the Town meet all six minimum ongoing goals, which are:

1. Public Education & Outreach
2. Public Involvement & Participation
3. Illicit Discharge and Elimination
4. Construction Site Stormwater Runoff Control
5. Post Construction Stormwater Management
6. Pollution Prevention & Good Housekeeping

So, who is responsible for meeting this Stormwater Management obligation? Virtually everyone:

- Town Board
- Building Department
- Fire Department
- Highland Central School District
- Highway Department
- Town Planning and Zoning Boards
- Town Attorney
- Town Engineer
- Water and Sewer Department
- Environmental Conservation Council
- Recreation Department
- Contractors working in the Town
- Homeowners and businesses in the Town
- The General Public

I will now go over the 2008 Stormwater goals (Year 6) which have been met and the new and continuing goals for next year 2009-2010 (Year 7)

A motion and vote are needed to accept this report and to authorize its submission to NYSDEC.
