

CHAPTER 58 -- FARMING

§ 58-1. Legislative finding and intent.

A. It is hereby found and declared by the Town Board of the Town of Lloyd that agricultural lands are irreplaceable assets. To that end, the Town Board finds farming to be an essential activity within the Town which greatly contributes to the economic viability of the Town. Farming also reinforces the special quality of life enjoyed by the Town's residents, provides the visual benefit of open space and generates economic benefits and social well-being within the community. Therefore, the Town Board emphasizes to both the Town's current residents and prospective newcomers to the Town that it is the policy of this Town to conserve, protect and encourage the development and improvement of agricultural land for the production of food and other products and also for its natural and ecological value.

B. Furthermore, the Town Board hereby supports those farmers, as well as all those employed, retained or otherwise authorized to act on behalf of farmers, in their efforts to lawfully and responsibly engage in the time-honored profession of farming. The Town Board hereby expresses its support of the enactment by the State Legislature of Chapter 797 of the Law of 1992 of the State of New York (see § 301 et seq. and Article 25-AAA of the Agriculture and Markets Law) which, among other things, added a new section to the Agriculture and Markets Law of the State of New York by establishing for the first time a statutory right to farm by prohibiting the commencement of private nuisance suits against farmers who engage in sound agricultural practices.

C. The Town Board, in an effort to promote and foster a harmonious relationship between the residents of the Town and those who contemplate purchasing land with the Town of Lloyd, and to conserve, protect and encourage the development and improvement of agricultural land for the production of food and other products, hereby declares that it shall be the policy of this Town to provide reasonable notice to prospective landowners that farming activities may occur on neighboring lands.

§ 58-2. Notice to prospective grantees.

A. Upon the submission of a preliminary subdivision plat or a multifamily residential site plan to the Planning Board of the Town of Lloyd, pursuant to Article 16 of the Town Law of the State of New York, the applicant, in addition to any other requirement, shall submit a separate statement to the Planning Board stating whether the boundaries of the proposed subdivision or multifamily residential dwelling are to be located partially, wholly or within 500 feet of either a NYS certified Agricultural District or land for which an individual commitment has been received pursuant to § 305 or 306 of the Agriculture and Markets Law of the State of New York.

B. Should any proposed subdivision or multifamily residence be located partially, wholly or within 500 feet of either a NYS certified Agricultural District or land for which an individual commitment has been received pursuant to § 305 or 306 of the Agriculture and

Markets Law of the State of New York, then the following notice shall appear on either the final subdivision plat or final site plan: "It is the policy of the Town of Lloyd to conserve, protect and encourage the development and improvement of agricultural land for the production of food and other products and also for its natural ecological value. This notice is to inform the prospective grantee that the property he or she is about to acquire lies partially, wholly or within 500 feet of either an agricultural district or land for which an individual commitment has been received pursuant to § 305 or 306 of the Agriculture and Markets Law of the State of New York and that farming activities may occur on such property. Such farming activities may include but not be limited to activities that cause noise, dust and odors."

C. In addition to the requirements of subsection B, the Planning Board shall also require as a condition of final subdivision or site plan approval that, prior to the initial sale, purchase or exchange of any real property within any such subdivision or multifamily residence, the grantor shall also deliver to the prospective grantee a typewritten document containing the notice set forth in subsection B. Further, the grantor shall incorporate said notice in any deeds wherein title to any such property is to be initially conveyed to a grantee.

State Environmental Quality Review
FULL ENVIRONMENTAL ASSESSMENT FORM

Purpose: The full EAF is designed to help applicants and agencies determine, in an orderly manner, whether a project or action may be significant. The question of whether an action may be significant is not always easy to answer. Frequently, there are aspects of a project that are subjective or unmeasurable. It is also understood that those who determine significance may have little or no formal knowledge of the environment or may not be technically expert in environmental analysis. In addition, many who have knowledge in one particular area may not be aware of the broader concerns affecting the question of significance.

The full EAF is intended to provide a method whereby applicants and agencies can be assured that the determination process has been orderly, comprehensive in nature, yet flexible enough to allow introduction of information to fit a project or action.

Full EAF Components: The full EAF is comprised of three parts:

- Part 1:** Provides objective data and information about a given project and its site. By identifying basic project data, it assists a reviewer in the analysis that takes place in Parts 2 and 3.
- Part 2:** Focuses on identifying the range of possible impacts that may occur from a project or action. It provides guidance as to whether an impact is likely to be considered small to moderate or whether it is a potentially-large impact. The form also identifies whether an impact can be mitigated or reduced.
- Part 3:** If any impact in Part 2 is identified as potentially-large, then Part 3 is used to evaluate whether or not the impact is actually important.

THIS AREA FOR LEAD AGENCY USE ONLY

DETERMINATION OF SIGNIFICANCE -- Type 1 and Unlisted Actions

Identify the Portions of EAF completed for this project: Part 1 Part 2 Part 3
Upon review of the information recorded on this EAF (Parts 1 and 2 and 3 if appropriate), and any other supporting information, and considering both the magnitude and importance of each impact, it is reasonably determined by the lead agency that:

- A. The project will not result in any large and important impact(s) and, therefore, is one which **will not** have a significant impact on the environment, therefore **a negative declaration will be prepared.**
- B. Although the project could have a significant effect on the environment, there will not be a significant effect for this Unlisted Action because the mitigation measures described in PART 3 have been required, therefore **a CONDITIONED negative declaration will be prepared.***
- C. The project may result in one or more large and important impacts that may have a significant impact on the environment, therefore **a positive declaration will be prepared.**

*A Conditioned Negative Declaration is only valid for Unlisted Actions

PART 2 - PROJECT IMPACTS AND THEIR MAGNITUDE

Responsibility of Lead Agency

General Information (Read Carefully)

- ! In completing the form the reviewer should be guided by the question: Have my responses and determinations been **reasonable**? The reviewer is not expected to be an expert environmental analyst.
- ! The **Examples** provided are to assist the reviewer by showing types of impacts and wherever possible the threshold of magnitude that would trigger a response in column 2. The examples are generally applicable throughout the State and for most situations. But, for any specific project or site other examples and/or lower thresholds may be appropriate for a Potential Large Impact response, thus requiring evaluation in Part 3.
- ! The impacts of each project, on each site, in each locality, will vary. Therefore, the examples are illustrative and have been offered as guidance. They do not constitute an exhaustive list of impacts and thresholds to answer each question.
- ! The number of examples per question does not indicate the importance of each question.
- ! In identifying impacts, consider long term, short term and cumulative effects.

Instructions (Read carefully)

- a. Answer each of the 20 questions in PART 2. Answer **Yes** if there will be **any** impact.
- b. **Maybe** answers should be considered as **Yes** answers.
- c. If answering **Yes** to a question then check the appropriate box(column 1 or 2)to indicate the potential size of the impact. If impact threshold equals or exceeds any example provided, check column 2. If impact will occur but threshold is lower than example, check column 1.
- d. Identifying that an Impact will be potentially large (column 2) does not mean that it is also necessarily **significant**. Any large impact must be evaluated in PART 3 to determine significance. Identifying an impact in column 2 simply asks that it be looked at further.
- e. If reviewer has doubt about size of the impact then consider the impact as potentially large and proceed to PART 3.
- f. If a potentially large impact checked in column 2 can be mitigated by change(s) in the project to a small to moderate impact, also check the **Yes** box in column 3. A **No** response indicates that such a reduction is not possible. This must be explained in Part 3.

If Any Action in Part 2 Is Identified as a Potential Large Impact or If you Cannot Determine the Magnitude of Impact, Proceed to Part 3

Part 3 - EVALUATION OF THE IMPORTANCE OF IMPACTS

Responsibility of Lead Agency

Part 3 must be prepared if one or more impact(s) is considered to be potentially large, even if the impact(s) may be mitigated.

Instructions (If you need more space, attach additional sheets)

Discuss the following for each impact identified in Column 2 of Part 2:

1. Briefly describe the impact.
2. Describe (if applicable) how the impact could be mitigated or reduced to a small to moderate impact by project change(s).
3. Based on the information available, decide if it is reasonable to conclude that this impact is **important**.

To answer the question of importance, consider:

- ! The probability of the impact occurring
- ! The duration of the impact
- ! Its irreversibility, including permanently lost resources of value
- ! Whether the impact can or will be controlled
- ! The regional consequence of the impact
- ! Its potential divergence from local needs and goals
- ! Whether known objections to the project relate to this impact.
